

ASHWIN KUMAR B

Full Stack Developer

ashwinbaskaran2002@gmail.com | +91-9361003309 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 1.8+ years of experience in designing, developing, and deploying web applications using React.js, Node.js, Python, and FastAPI. Experienced in building responsive user interfaces, REST APIs, authentication systems, database-driven applications, cloud deployments, and microservices. Hands-on experience with AI/LLM integrations, RAG, vector search, browser automation, and AI-powered testing workflows. Strong problem-solving skills with experience in debugging production issues, performance optimization, and Agile development.

TECHNICAL SKILLS

- Frontend:** React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, React Router
- Backend:** Node.js, Python, Express.js, FastAPI, REST APIs
- Database:** PostgreSQL, MySQL, MongoDB, Redis, Vector Database
- Cloud & Platforms:** AWS, AWS S3, Docker, Hostinger, Nginx, CI/CD Basics
- AI & Intelligent Systems:** AWS Bedrock, OpenAI API Integration, LLM Integration, RAG, Vector Search, AI Agents, Prompt Engineering
- Tools:** Git, GitHub, Jira, Postman
- Other:** JWT Authentication, Role-Based Access Control, API Integration, Deployment, Responsive Design

PROFESSIONAL EXPERIENCE

Full Stack Developer – Annular Technologies

Chennai | Dec 2024 – Present

- Developed full-stack web applications and microservices using React.js, Node.js, Python, and FastAPI.
- Built responsive UIs with React.js, Tailwind CSS, and Redux Toolkit, ensuring seamless cross-device experiences.
- Designed and integrated secure REST APIs with JWT authentication and role-based access control (RBAC).
- Developed and optimized database-driven applications using PostgreSQL, MySQL, MongoDB, and Redis.
- Integrated third-party APIs for payments, communications, and LLM-powered AI functionalities.
- Handled end-to-end deployment on AWS and Hostinger while optimizing API performance and resolving complex production bugs.

PROJECTS

AI Testing Orchestrator

Aug 2026 – Present

AI-Powered Test Automation & Self-Healing System

Tech Stack: React.js, JavaScript, Python, FastAPI, Playwright, PostgreSQL, AWS Bedrock, WebSockets

- Developed an AI-powered testing orchestrator that analyzes Git repositories and Swagger schemas to autonomously generate BDD scenarios and Page Object Model (POM) Playwright test scripts.
- Integrated AWS Bedrock (DeepSeek) LLMs using Model Context Protocol (MCP) and ReAct loops for intelligent codebase mapping and test generation.
- Built a backend with FastAPI and Python, handling isolated Playwright browser executions in ephemeral sandbox environments.
- Implemented real-time execution tracking via WebSockets and integrated a secure AES-encrypted credential vault for runtime data injection.
- Developed an AI-powered Root Cause Analysis (RCA) engine that automatically captures DOM snapshots, network logs, and traces to triage script failures and generate self-healing code patches.

GTMer – Client Project

Oct 2025 – Jul 2026

AI-Powered Go-To-Market Automation Platform

Tech Stack: React.js, JavaScript, Python, FastAPI, PostgreSQL, Redis, AWS Bedrock, REST APIs, Docker, AWS

- Developed an AI-powered Go-To-Market platform utilizing a microservices architecture with React.js, Python, and FastAPI to automate complex sales outreach workflows.
- Integrated AWS Bedrock LLMs for automated lead intelligence, ICP scoring, competitor analysis, and generating highly personalized email campaigns.
- Built a robust RAG-based conversational chatbot utilizing vector search and tenant-specific knowledge bases to assist sales representatives in real-time.
- Designed and managed backend infrastructure using PostgreSQL and Redis, implementing background workers for data scraping, metered billing, and Razorpay payment gateways.

Chennai Pet Care System (TNPMS) – Client Project

Dec 2024 – Sep 2025

Pet Registration & Animal Management Platform

Tech Stack: React.js, JavaScript, Redux Toolkit, React Router, Bootstrap, Axios, Leaflet, REST APIs

- Developed a comprehensive, multi-portal Pet Registration and Animal Management Platform supporting distinct workflows for citizens, licensing officers, and veterinary administrators.
- Architected scalable modules for managing pet licenses, travel certificates, microchips, and extensive pet profiles.
- Implemented an interactive, map-based Pet Cruelty and Grievance reporting system leveraging Leaflet and spatial data integration.
- Built complex UI layouts, dynamic data tables, and administrative dashboards using React.js, Redux Toolkit, and seamless REST API integrations.

EDUCATION

B.E. – Computer Science Engineering

SNS College of Technology, Coimbatore
