

ASHWIN KUMAR B

Full Stack Developer

ashwinbaskaran2002@gmail.com | +91- [9361003309](tel:9361003309) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of experience in designing, developing, and deploying scalable web applications using React.js, Node.js, and Python. Experienced in building responsive user interfaces, REST APIs, authentication systems, and cloud deployments with a strong focus on performance, clean architecture, and user experience. Skilled in collaborating within Agile teams, debugging production issues, and delivering production-ready applications.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Vue.js, Redux Toolkit

Backend: Node.js, Python, Express.js

Database: PostgreSQL, MySQL, MongoDB, Vector Database

Tools & Platforms: AWS, Docker, Hostinger, Git, GitHub, Jira, Postman

AI & Automation: OpenAI API Integration, OpenClaw, AI Workflow Automation, AI Agents Basics

Other: REST APIs, JWT Authentication, Deployment, CI/CD Basics, Responsive Design

PROFESSIONAL EXPERIENCE

Full Stack Developer – Annular Technologies, Chennai

Dec 2024 – Present

- Developed and maintained scalable full-stack web applications using React.js, Node.js, and Python.
- Built reusable UI components and responsive layouts using Tailwind CSS and modern frontend practices.
- Designed and integrated REST APIs for authentication, dashboards, reporting, and data management modules.
- Handled application deployment, server hosting, and environment configuration on AWS and Hostinger.
- Collaborated with designers, QA teams, and developers in Agile sprint-based development cycles.
- Optimized application performance by reducing API response times and improving frontend rendering.
- Worked with PostgreSQL and MongoDB for database design, CRUD operations, and query optimization.
- Resolved production issues, implemented bug fixes, and improved overall system stability.

PROJECTS

HealthCare – Doctor Appointment & Diagnostic Management System

Dec 2024 – May 2025

Tech Stack: React.js, Redux Toolkit, Tailwind CSS

- Developed a healthcare platform supporting both online and walk-in appointment booking.
- Implemented doctor search, scheduling, and appointment management based on specialization and availability.

- Built diagnostic management modules for test booking and medical report tracking.
- Designed role-based dashboards for patients, doctors, and lab staff.
- Used Redux Toolkit for centralized state management and improved application scalability.

Tifoh Smart Meeting Management System

Jun 2025 – Nov 2025

Tech Stack: React.js, Node.js, REST APIs

- Developed a multi-tenant meeting room booking and management platform.
- Integrated Google Calendar and Microsoft Graph APIs for real-time scheduling synchronization.
- Implemented JWT-based authentication and secure role-based access control.
- Built real-time meeting status tracking and scheduling features.
- Designed scalable backend APIs to manage large datasets and concurrent requests.

PET Care – Pet Registration & Vaccination Tracking System

Dec 2025 – Present

Tech Stack: React.js, Redux, Node.js

- Built a government-based application for pet registration and vaccination tracking.
- Developed appointment booking, vaccination history, and notification modules.
- Integrated authentication workflows and API communication for secure data handling.
- Implemented reusable form components with validations for better user experience.
- Created dashboards for administrators and users to manage records efficiently.

EDUCATION

B.E. – Computer Science Engineering | SNS College of Technology, Coimbatore

ADDITIONAL INFORMATION

- Strong understanding of frontend architecture and component-based application design.
- Hands-on experience in API integration and backend communication workflows.
- Experience in deploying and maintaining production-ready web applications.
- Basic knowledge of AI integrations, OpenAI APIs, AI workflow automation, and vector database concepts.
- Familiar with AI agent development, prompt engineering, and intelligent assistant workflows using OpenClaw.
- Experience working in Agile development environments using Jira for sprint and task management.
- Good problem-solving, debugging, and performance optimization skills.
- Quick adaptability to new technologies and collaborative development environments.
