

ASHWIN KUMAR B

Full Stack Developer | React.js • Node.js • Python • FastAPI • Cloud & AI Systems

ashwinbaskaran2002@gmail.com | +91-9361003309 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with almost 2 years of experience designing, developing, and deploying scalable web applications and microservices using React.js, Node.js, Python, and FastAPI. Proficient in building responsive UIs, secure RESTful APIs with JWT authentication and role-based access control (RBAC), and optimizing relational and NoSQL databases including PostgreSQL, MySQL, and Redis. Hands-on expertise in integrating AI/LLM solutions, RAG pipelines, autonomous test automation workflows, and end-to-end cloud deployments on AWS and Hostinger with a focus on performance tuning and Agile delivery.

PROFESSIONAL EXPERIENCE

Full Stack Developer – Annular Technologies

Chennai | Dec 2024 – Present

- Developed full-stack web applications and microservices using React.js, Node.js, Python, and FastAPI.
- Built responsive UIs with React.js, Tailwind CSS, and Redux Toolkit, ensuring seamless cross-device experiences.
- Designed and integrated secure REST APIs with JWT authentication and role-based access control (RBAC).
- Developed and optimized database-driven applications using PostgreSQL, MySQL, MongoDB, and Redis.
- Integrated third-party APIs for payments, communications, and LLM-powered AI functionalities.
- Handled end-to-end deployment on AWS and Hostinger while optimizing API performance and resolving complex production bugs.

PROJECTS

AI Testing Orchestrator

Aug 2026 – Present

AI-Powered Test Automation & Self-Healing System

- Developed an AI-powered testing orchestrator that analyzes Git repositories and Swagger schemas to autonomously generate BDD scenarios and Page Object Model (POM) Playwright test scripts.
- Built a high-performance FastAPI and Python backend integrating AWS Bedrock LLMs via Model Context Protocol (MCP) and ReAct loops for intelligent codebase mapping and test execution in ephemeral sandboxes.
- Implemented an AI-driven Root Cause Analysis (RCA) engine capturing DOM snapshots, network logs, and traces for self-healing code patches, with real-time WebSocket tracking and AES-encrypted credential vault.

GTMer – Client Project

Oct 2025 – Jul 2026

AI-Powered Go-To-Market Automation Platform

- Architected a microservices-based Go-To-Market platform using React.js, Python, and FastAPI to automate complex sales outreach workflows and multi-channel marketing campaigns.
- Integrated AWS Bedrock LLMs for automated lead intelligence, ICP scoring, competitor analysis, and personalized campaign generation, backed by a vector-search RAG chatbot for real-time sales assistance.
- Designed and managed backend infrastructure with PostgreSQL and Redis, deploying asynchronous background workers for web scraping, metered billing, and secure Razorpay payment gateway integration.

Chennai Pet Care System (TNPMS) – Client Project

Dec 2024 – Sep 2025

Pet Registration & Animal Management Platform

- Developed a comprehensive, multi-portal Pet Registration and Animal Management Platform using React.js, Redux Toolkit, and REST APIs, supporting distinct workflows for citizens, licensing officers, and veterinary administrators.
- Architected scalable core modules for managing pet licenses, digital travel certificates, microchips, and administrative dashboards with dynamic reporting and data tables.
- Implemented an interactive, map-based Pet Cruelty and Grievance reporting system leveraging Leaflet GIS and spatial data integration for real-time tracking and issue resolution.

EDUCATION

B.E. – Computer Science Engineering

SNS College of Technology, Coimbatore
